Ranchers Plow Through Snow to Give Pass Milk

Horses Exhausted As They Break Trail And Pull Sleighs Loaded With Milk; Pass Dairy Meets Ranchers On Highway.

Pass milk consumers who take for granted the fact that milk will be available each morning will be interested to learn the work and hardship involved in getting milk to Pass milk depots every day.

Milk has been unobtainable from either Lethbridge or Calgary since the storm struck and for several days before that. As a result ranchers having milk cows in the Cowley district have been supplying fluid milk to aid the Pass milk producers to serve Pass consumers. The snow struck just as heavily in the Cowley and Lee Lake areas as it did in the Pass towns. As a result these ranchers have been bucking heavy snows in order to get their milk to the highway where it is picked up by Pass Dairy trucks.

Here is an example. Bert Reners, rancher, resides in the Lee Lake district. Due to the storm the easiest way in which he can reach No. 3 highway is to come over the hills and reach the highway on the Pincher Creek corner east of Cowley, a distance of six miles from his farm. His team of horses were so exhausted one day hauling the milk laden sleigh that he was forced to stop at a rancher friend, Joe Motel. Mr. Motel hitched his team to the sleigh and pulled it to the highway where the Pass Dairy trucks were waiting. Mr. Reners' horses were so exhausted that he had to stable them at the Motel farm and go home on foot.

Mike Yakubovic, of the Lee Lake district, comes out at Burnis and harnesses four horses to pull a sleigh loaded with from 6 to 10 eight gallon milk cans.

Pass Dairy has six producers at the present time in the Cowley area and when they leave the farm for the highway they phone Pass Dairy which in turn sends out two trucks to meet them at certain points. Due to rough travel the Pass Dairy drivers have had to sit in their trucks five hours waiting on the farmer reaching the highway.

One farmer set out at 8 a.m. one day and reached the highway at 6 that evening after covering only a few miles. One rancher bucked snow and drifts all day only to have five of his milk cans rejected because of stinked flavor in the milk. Most of his work that day was for nothing.

Before consumers start "beefing" about milk service they should give sober thought to the producers and distributors who are working practically night and day to get milk to the depots.

JUNIOR RED CROSS TO SELL CALENDARS

Miss A. Yuill and her Junior Red Cross members are again preparing to launch their annual calendar drive throughout the community. The calendars sell at 10 cents each and soon a Junior Red Cross member will be knocking at your door and soliciting your support by buying a calendar.

The proceeds derived from the drive are sent into provincial headquarters where the various Junior Red Cross charities are given financial support.

MILK DEPOT AT THE CUB

Pass Dairy has established a milk depot at the Cub cafe in west Coleman. This depot will be open from 11 a.m. to 2 p.m. daily. Sunday included and is intended to serve West Coleman consumers, Cardinale and Willow Drive.

The depot in the Rite Spot is open till late evening.

Bonspiel To Be Held On Sunday; Turkeys As Prizes

Bonspiel To Officially Start New Season; League Play Starts Monday Evening.

Four sheets of ice have been marked and are now ready for play at the local curling arena. On Sunday afternoon a sheet was made ready and several members got in some needed practice. The rocks sent to Calgary last April to be sharpened are now enroute from Calgary and should be received at the arena some this week providing the highways remain clear and the transport can navigate to the Pass from the city.

A club bonspiel will start at 9 a.m. Sunday. All rinks have to be entered no later than this Friday evening and entries will be received by secretary George Ford at the arena or Jim Kerr at The Motordrome. The draw will be posted in The Motordrome on Saturday evening at 6 o'clock.

Turkeys will be awarded as prizes and the entry fee will be \$4 per rink.

The league schedule will get away to a flying start on Monday evening and the week's draw will be posted in the arena on Sunday in order that all may know the evenings on which they are scheduled.

Funeral Of Mrs. Rose Dunlop Held On Friday

Body Placed In Vault At Blairmore Until Weather Moderates.

The funeral of Mrs. Rose Dunlop was held on Friday afternoon at 3 o'clock, services being conducted at St. Paul's United church, Rev. Magowan officiating. Despite the severity of the weather the church was well filled with friends and members of Victoria Rebekah lodge, of which Mrs. Dunlop had been an active member. Hymns sung were favorites of the deceased—"Oh God of Bethel" and "Rock of Ages."

The Rebekah lodge held its service at the family residence prior to the church service.

Since weather conditions did not permit burial arrangements the body was taken to the vault at Blairmore Funeral Parlours and burial will take place just as soon as the weather moderates.

Pallbearers included old friends of the family and were F. Cox, J. M. Allan, Edgar Ash, Tom Higginbotham, J. J. McIntyre and T. E. Flynn.

CARD OF THANKS

We sincerely thank all those who were so kind in our recent bereavement, and also the many friends who were so thoughtful during the period of our mother's illness.

INEZ D. GILLIS.
WINNIFRED DUNLOP.

Barnett and Trustees Fail to Reach Agreement

Trustees Grant "Substantial" Wage Increases But Two Sides Deadlocked Regarding Retro-active Clause.

The meeting of the Coleman school trustees, J. W. Barnett, ATA and Conciliator K. A. Pugh, held Sunday, Nov. 17, lasted approximately twelve hours as debate centred on the new wage agreement being drafted between the board and the teaching staff.

In an interview with The Journal on Tuesday evening board chairman George Evans stated that "substantial" increases had been granted the teachers, particularly the lower grade teachers, and that he personally believed that the increases would prove acceptable to the members of the teaching staff.

The only point his board and Mr. Barnett could not reach full agreement was in the retroactive clause. Mr. Barnett had argued that the agreement should be retroactive to September 1. The board argued that the new wage agreement should go into effect on January 1, 1947. A suggestion that the contract go into effect November 1 also failed to meet full agreement between both parties.

Once agreement has been reached as to the actual date when the contract will be deemed to have gone into effect the board will release the new wage schedules.

ARENAS NOW OPEN FOR WINTER MONTHS

Ice is now available to skaters and hockey teams at the local skating arena. Due to the heavy snow last week the opening date was set back by the Sports Association who feared that the weight on the roof might cause damage while youngsters skated on the ice surface. To eliminate that danger no skaters were allowed on the ice.

On Sunday one sheet of curling ice was ready for play and a number of curlers got in some practice. There were a number of enthusiastic curlers present who stood on the sidelines and gave expert advice free of charge.

At a recent meeting of the membership the executive were authorized to start the season as soon as all four sheets of ice were ready for play. As a result president Andy Dow is expected to be heard calling his club members into league play within the next week.

All skips have to have their rinks entered before Nov. 30 and all individuals desiring to play and who are not yet placed on a rink are also expected to have their names recorded with secretary George Ford before Nov. 30.

20 YEARS AGO ITEM

In the Nov. 25 issue of the Lethbridge Herald the following item was carried under the "20 Years Ago" head.

"Fire is now raging in the West Coleman McGillivray mine following yesterday's explosion. 'Big Frank' Serik, Russian miner, led six of his mates to safety from the pit."

Ed's Note: Serik was killed almost six years ago in a mine accident.

REMEMBRANCE DAY SERVICE

People shop where they are invited—that's why it pays to advertise.

Public Aroused Over Treatment To Horses

Heavy Snows Cause Horses To Starve; Meeting Of Horse Owners Suggested.

Heavy snows and starving horses have combined to arouse public anger against owners of these creatures who allow them to tramp through winter snow and ice, digging for frozen grass or nosing into garbage pails to ward off hunger and death.

The severe storm of the past week has caused these horses to roam the residential area and many housewives have been moved in pity to take scraps out to the street for them.

The plight of these animals came up for a brief discussion at the regular meeting of the council last week but no decision was made. The Mayor is in receipt of a letter from a householder prevailing upon the former to take some step which would alleviate the suffering of the horses, and asking him to bring to task the owners of the animals who are so cruel hearted as to allow their summer pets to suffer and die.

The suggestions have been made that the town place the animals in a pound or call a meeting to which all horse owners would be asked to attend and determine what could be done for the horses, not for this year alone but for the years to come.

To place them in a pound would cost the town a miniature fortune in feed costs. Should the meeting be held it could debate the suggestion of the pound with the owners crying for the feed costs.

Possibly the suggestion of placing the horses in a pound is the most humane. This practice could be maintained each year and the horses would be given food and protection. It could easily be accomplished if the owners would agree to the payment of the feed bill.

A third suggestion has been made that those horses found suffering from hunger and in poor physical condition be shot and put out of their misery.

REV. JOE KIRK WRITES THE JOURNAL

The Journal is in receipt of a very nice letter from Rev. J. E. Kirk, of Lamont United church, and formerly minister at St. Paul's United church.

Rev. Kirk praises highly Rev. Dr. Magowan and states that St. Paul's congregation will undoubtedly be enjoying both he and Mrs. Magowan. Rev. Kirk was for a time secretary of the Coleman Lions club and will retain much interest in its activities as recorded in The Journal. Always a good community worker he is pleased to note that Coleman is still encouraging its Drama Festival to greater success.

His eldest son, Stanley, is attending school at Edmonton while the two younger children are attending school at Lamont.

In commenting on the recent Remembrance Day service he tells of the Remembrance Day service held the day following the disastrous Zak's fire at which the Legion, Air Cadets, Poppy girls and the Air Cadet Bugle band all took part in the parade.

BEHEAVED

Mr. Aldo Montalbetti left for Edmonton on Tuesday morning's train where he will attend the funeral today (Thursday) of his brother-in-law, William McFarlane, who passed away in the city on Monday. Mr. Montalbetti is expected home on Saturday morning.

Portable Typewriters Available For Xmas Presents

The Journal has received two portable Remington Typewriters with two more promised for December delivery.

These machines are exceptionally fine Christmas presents for the student. They are strongly constructed and with normal care will last for many years without repair.

Parents interested in a typewriter for their son or daughter are invited to call at The Journal office where the machines are now on display.

THEATRE NOTES

With the exciting impact of "Laura" still fresh in the memories of movie-goers, 20th Century-Fox scores still a greater triumph in unusual and solid motion picture entertainment with "Fallen Angel," which opens Saturday at the Palace theatre. Starring Alice Faye, Dana Andrews and Linda Darnell, "Fallen Angel" stands as the most gripping drama of desire and murder that has yet come to the screen.

"Fallen Angel" reveals the shocking tale of a girl whose love for a man is haunted by the irresistible hold the terrible fascination of another woman has on him, of a man who can only be freed from the overpowering obsession of lust and a haunting smile—by murder, and of an other girl whose sultry beauty and warm, inviting embrace holds the promise of tragedy.

Ladd And Fitzgerald Score In Thriller

The first film based on the hair-raising exploits of the men and women of the Office of Strategic Services—our intelligence agency—arrives Saturday at Cole's theatre. It is Paramount's thrill jammed adventure, "Q.S.S." Co-starring Alan Ladd and Geraldine Fitzgerald, with Patric Knowles, John Hoyt, Richard Benedict, Harold Vermilyea, among other excellent performers.

"Q.S.S." is a gem of an action film. Never a dull moment, it races along from thrill to thrill, giving the audience more entertainment per foot of film than is generally found in even the fastest-paced movies. It features Alan Ladd at his best, out-fighting, out-shooting, out-witting his adversaries, and there are many in this exciting tale of sabotage in Nazi-occupied France.

MAJOR A. E. LARKE NEW LEGION PRESIDENT AT MAGRATH

Major A. E. Larke, former minister at Coleman United church, has been appointed president of the Magrath branch of the Canadian Legion.

Major Larke served overseas for several years and following his return to Canada visited friends in Coleman and other Pass towns.

Pass Digs Itself Out Of Heavy Snows

Snow Plows Work Overtime To Keep Highways Open; Coal Supplies Now Moving Freely.

Pass citizens have been shovelling themselves out of the worst winter storm in many years and are starting to get back into normal routine. During the week the weather has moderated considerably over that of last week and traffic is coming back to the highways.

On Monday it was reported three snow plows were busy west of Coleman in a determined effort to keep the road clear of drifts. The highway between Coleman and Bellevue has been kept open and milk and bakery trucks are once again navigating without major difficulty. The Pass Dairy however has still not started its door-to-door delivery and maintains a milk depot at The Rite Spot.

The town has employed the Sag-gol bulldozer and this machine can be heard nightly as it widens the various residential streets and clears away the loose snow on the various streets dug up by the numerous trucks which pass over them daily. The coal trucks are endeavoring to catch up on the huge pile of orders. Where paths have been cut through the snow leading to the coal chutes the truck driver will make an honest attempt to place the coal in the bin. Where paths have not been cut and the consumer is in dire need of coal the driver will dump his load at the front gate.

Credit is coming to town foreman Malachuk who worked ceaselessly throughout the storm, one day working twenty-two hours before members of the town council became aware of this fact and ordered him home to rest. He kept the streets open as best he could with the town plow which proved inadequate in the heavy snow and then directed the bulldozer driver when the town employed the bulldozer to clear the streets.

Parking on main street is not encouraged due to the narrow lane through town.

CLAN DONNACHAIDH NOTES

The committee in charge of the Clan Donnachaidh Society dances are very gratified by the response of the public to their plea for support and co-operation. The sale of tickets has been very good and a large attendance is sure to be on hand.

The pipe band will play during intermission and if any number of people want old time dances this will be their opportunity as any one of the pipers will be pleased to play for them. Intermission is from 11:30 till midnight.

The Clan's proper motto is "Virtutis, Gloria, Merces." While this is also the Coleman Clan motto, they have adopted a social one, namely "Give the public good entertainment value for their money and their patronage is assured."

ST. PAUL'S UNITED CHURCH

Rev. R. Magowan, B.A., DD, Pastor 11 a.m. Morning worship 12:15 noon, Sunday school 7:30 p.m. Evening worship Fireside Hour in club room at close of the evening service. Everyone invited.

Health LEAGUE of CANADA presents TOPICS OF VITAL INTEREST

BEWARE - - OF RARE PORK

"And the swine is unclean to you. Of their flesh shall ye not eat and their carcass shall ye not touch." Such was the admonition given by Moses to the wandering Children of Israel more than 2,000 years ago. Moses undoubtedly had some good reason for formulating such a law, it being altogether likely that he had noticed that serious illness sometimes followed the consumption of pork. Centuries later Mohammed forbade his followers the use of pork as a food.

Thus millions of people who today adhere strictly to the tenets of certain religious beliefs are spared the possibility of contracting a disease known as trichinosis. Trichinosis is a disease which 100 years ago was first recognized as one which resulted from eating pork which had become infested with a worm-like parasite—Trichinella Spiralis.

For those who do eat pork, it is imperative that they remember that raw or partially cooked pork is dangerous—that pork and pork products always should be well cooked.

In the year 1835, Sir James Paget, famous English surgeon, was doing a post-mortem when he noticed that numerous small line and calcium-like swellings in the muscles were taking the edge off his knife. He took out some of these nodules and showed them to Robert Owen of the Royal College of Surgeons. Owen broke open some and examined them through a microscope. He found that inside each shell-like nodule, not as big as a grain of wheat, was a small, curled up worm, hair-like in size and consistency. He named the worm "Trichinella Spiralis" which really means "little hair of a spiral shape."

Today, the medical fraternity call this parasite "Trichinella Spiralis" which means practically the same thing. It is known that "Trichinella Spiralis" is a very small worm which is a parasite of the pig, and which, when eaten alive by a human being (as it may be when uncooked or partially cooked pork is eaten) becomes a parasite of the human being, and causes disagreeable and often fatal illness known as trichinosis.

The parasite is a small round worm. The pig is the animal most commonly infected, although rats and bears which eat infected pork may also become infected. The young worm, or larva, is very small and bores through the wall of the pig's bowel and gets into its muscles. In the muscles of the pig these small larvae surround themselves with a sac which after perhaps a year, becomes calcified and forms the hard small nodules which Sir James Paget noticed in 1835.

Pigs usually get infected in the first place by eating uncooked pig flesh—pork clippings in garbage. Care

Build Home On Loot

Portland Couple Face Thirty Theft Charges

PORTLAND, Ore.—A three-room home built with stolen materials was listed today along with household furnishings and extensive wardrobes. Sheriff Martin Pratt said were accumulated in a year by a young woman and her ex-husband charged here with 30 burglaries.

The sheriff said the \$10,000 in loot which four deputies spent a night and a day itemizing included a \$1,200 mink coat, two sets of silverware, a vacuum cleaner, radios, a portable sewing machine, a typewriter and several hundred houseware articles and clothing.

Sheriff Pratt reported William Franklin Leonard, 41, and his divorced wife, Christina Leonard, readily admitted the thefts after their arrest in the home they built a few months ago.

Most of the stolen building materials had been taken from housing project jobs on which Leonard worked daytime during the last year. Sheriff's Deputy Lyle Cocking said the woman would drive a small truck at night to a home where her husband had broken in and together they would haul away the plunder.

Most of the articles were identified as coming from Portland's middle-class suburban homes where the sheriff's officers said a robber who left red candle drippings had operated for many months. Deputy Cocking said candles were in abundance in the Leonards' new home and Sheriff Pratt earlier had reported Leonard admitting his trade was "safe cracking" bemoaning leaving his former trade.

The couple married two years ago but divorced five months ago although they still worked together from the home, Sheriff Pratt reported. Sheriff Pratt said Leonard humbly blamed his error in robbing the home at a city detective—a former acquaintance—for his "change of luck" and arrest. The sheriff said Leonard's ex-wife told him Leonard almost killed himself in traffic trying to get to a bridge and throw away a fur neckpiece when he discovered it was taken from the home of City Detective Collie Stoops. The sheriff quoted Leonard as saying "I've had bad luck ever since."

WORKED AS OFFICE BOY
George Bernard Shaw, renowned writer, worked as an office boy in the 1870s in a Dublin real estate office at a salary of \$4.50 a month, according to the Encyclopedia Britannica.

Never use DDT products near foods or drinking water.

therefore should be taken to see that pigs are not fed on untreated garbage, and that rats are kept away from piggeries, abattoirs and packing houses.

But since the pig, when he does get infected, has thousands of these larvae all through his body, it is impossible by means of any practical method of meat inspection to safeguard the public absolutely. The public must safeguard itself, and the only way is to make sure that pork or pork products are well cooked before eating.

Remember, rare pork is dangerous!

WORLD HAPPENINGS BRIEFLY TOLD

King's Cross railway station in London is to be rebuilt at a cost of \$5,000,000.

The White House, closed to the public since shortly before the war, has been reopened to visitors.

Canada will receive 10,000 tons of German shipping—three vessels in all—as part of her reparations in the war against Germany.

A new iodine-containing tablet for purifying water in soldiers' canteens, considered superior to the chlorine type used during the war, has been developed in Boston.

Rev. Arthur Sewell, oldest member of Oxford University and oldest clergyman of the Church of England, recently celebrated his 105th birthday.

The Sunday Chronicle reported that technicians in the Soviet zone of Germany are developing a long-distance rocket which pin-points its target.

The late Hermann Goering's hunting chalet at Berchtesgaden, near Hitler's mountain eyrie, has been taken over by the Bavarian state, the Forestry Administration announced.

The southernmost German city of Wesel, which was 95 per cent destroyed during the war, is to be rebuilt on the same site. Before the war Wesel was a city of 25,000 persons.

FUSSY CROCODILE

TOWNSVILLE, Australia.—A 14-foot crocodile in a private zoo, in this northern Queensland State town is so fastidious it won't feed until owned by St. John Robinson cleans its teeth with an ordinary toothbrush. Robinson, a master butcher, keeps the zoo, one of the largest private collections of animals in Australia, as a hobby.

The word panic is derived from Pan, the name of a mischievous pagan nature god who inspired terror in humans.

Chicken feathers have been made into an experimental yarn.

Quality Guaranteed "SALIA" TEA

**OUR COMPLETE
SHORT STORY—
THEN EVERYTHING
STOPPED**
By CAROL ELY HARPER
Copyright
Wheeler Newspaper Syndicate

WELL, it came out all right—but I told you, I had to stay awake the rest of the night to keep Nels from getting shot.

I started it. I don't know why, but I'm always starting things.

Chubby doesn't like it. Chubby's my husband. I call him that because he's chubby.

Like that time I went up to the hotel room with Bennie. Bennie is an old schoolmate of mine. I just went up to look at his fishing tackle. Of course I didn't know Chubby was out on the sidewalk looking in and saw me step in the elevator with Bennie. If I'd known Chubby was there I'd have waited for him, of course. Chubby about brained him—but when the burglar—and Chubby was gone—well—I don't think there was any excuse for Chubby getting so mad over that.

It was like this. We were on the wheat ranch that winter—Chubby thought maybe he could make it pay if he worked it himself—that was before he found out he couldn't and gave up and went back to town—to the hardware store—and the burglar had been breaking into ranches and miles around, robbing off and on the past six months. I was sure our turn was going to come next and I was terribly nervous.

I begged Chubby not to go to the city that night, but he got mad and sore. "Now look here," he said, "You know I've got to go in and get that tractor and drive it out early in the mornin'. And you can't go because you'd just be in the way! This is business!"

"But I'll be all alone!" I wept.

"But you won't be all alone," he was quite irritated. "Nels was our hired man. 'But he sleeps out in the bunkhouse!" I wailed.

"That's near enough!" Chubby barked, not a bit sympathetic. "Now look, I'll leave you the rifle. You sleep with it. If you hear anything, shoot twice. Nels will hear and come on the jump, won't you, Nels?"

"Sure!" said Nels affably, looking up from the tail end of his supper. "Sure! I'll take care of her! Chub! You go on into town and don't worry! I'll take care of her!"

So Chub went. He took the automatic with him, and he should meet with a road holdup. That burglar was sure terrorizin' the country side mighty bad.

Well, when the dishes were washed and the chores done and Nels gone, I went upstairs and I got ready for bed. I put on my long white flannel nightgown. And then I took the rifle right under the sheets and cuddled it. And, believe me, my hand was shaky, but I kept it right on the trigger!

"Now come on, have some guts, Mary!" I told myself. "Cheer up, Mary, old girl!" I laid there in the dark, and I tried to shut out all thoughts except havin' some guts. Right through my eyelids I could see the room was full of crawling shapes. I mean, it looked like it was full of crawling shapes. I was so scared.

Then something made a sound. I don't know what it was, but there was a slitherin' sound, just outside my window. I felt like an earthquake quakin', and my finger came down on the trigger twice. The holes are still in the head board of our bed.

In two shakes of a lamb's tail Nels was there. He was wild eyed and dangerous looking in his night shirt. His gun in his hand, he reconnoitered over the house. He came back. "There ain't nobody in the house!" he said. "And there ain't nothin' outside. I looked good."

I was still shaking. "All right," I said. "But you're not going back to that bunkhouse! You sleep on the couch downstairs!" I went back to bed, with the rifle, again. Nels was sleepin' with his gun, in the dinin' room. His automatic went off awful easy. I remembered, with satisfaction.

All the doors were locked. And I had locked all the windows except the one in the living room that won't lock any more. That window is under my upstairs bedroom window.

It must have been about two hours later when I heard somethin' gettin' in that livin' room window. There wasn't any doubt about it this time—somebody was crawlin' through that unlocked window!"

I was too genuinely scared this time to make a sound. I tried to scream to Nels but my voice was stuck in my throat. I laid there, vocally paralyzed, and shook. Then I heard Nels gettin' up off the couch in the dinin' room, that our upstairs staircase opens onto. I got up courage enough then to slip out of bed, with my rifle.

Somehow I got out on the landing. I had some notion, I think, of helpin' Nels if the burglar took him from behind. Anyway, I was ready to defend myself if the burglar brained Nels and tried to pull anything on me.

I listened. No lights showed downstairs. The burglar didn't even have a flashlight on! Then I heard steps. The steps went, soft, stealthily, from one room to another. Then I heard other steps, followin' the first steps! One man followin' another! It was terrible! I tried to get up my nerve—I just had to help Nels!

Down below the steps—steps went on—around the rooms—slink—slink—one man stalkin' the other! All this time I was feelin' for the light switch on the landing, but my fingers were so stiff I couldn't find it. Then I found it. Standin' there in my flannel nightgown I switched on the downstairs lights.

Well, what I saw made me faint, so then everything stopped—or I don't know what might have happened! Chubby almost divorced me for it, but I finally got it explained.

No wonder I fainted! When the lights went on, there at the foot of the stairs stood Nels and Chubby—their pistols pointed at each other. "I thought so!" said Chubby, looking at Nels.

I don't understand why Chubby gets so jealous.

BRITISH SOLDIERS NOT TAKING TO NEW UNIFORMS

LONDON—Tommy Atkins' new blue dress uniform got a blue reception at its first showing in Albert Hall recently.

Watching a preview of young British soldiers in the new blue tunics, blue trousers, with wide red stripe, and blue beret, the veterans of khaki days thought the new "walking out dress" was not so smart.

An ex-Regimental Sergeant Major said: "I think it could do with a bit of livin' up!" An ex-officer declared: "Nothing really to attract young men to the army."

But one ex-serviceman liked it. "Jolly—it's easier to keep clean," he said.

PLOWING EXPENSIVE

MCBRIDE, B.C.—Robert Sansom found his fall plowing expensive. He plowed under \$1,300 when his wallet dropped from his pocket while operating a tractor. He has a wide field to search, a three acre tract of land on his 360 acre farm here.

DRUG MAY END HEART DISEASE

Penicillin Has Become Effective
In Treating Endocarditis

NEW YORK—Penicillin is effective in prevention and treating one of the most deadly heart diseases, Dr. Homer F. Swift, chairman of the American Council of Rheumatic Fever of the American Heart Association, said at the council's annual meeting.

The disease, he said, is known as sub-acute bacterial endocarditis, an infection that occurs in patients who have rheumatic heart disease. Before Penicillin, it was nearly always fatal.

At least half of the cases of this infection occur after a tooth extraction or an operation of the upper air passages, Dr. Swift said, and he urged national education for dentists and physicians, as well as the general public, in the new use for penicillin.

"If the patient receives penicillin prophylaxis prior to the extraction of a tooth, or any mouth or throat operation, the disease can be prevented," he said. "Where this is not done, and the disease develops, penicillin administered in large doses and over a long period of time can cure the majority of cases."

Bacterial endocarditis is a serious infection of the heart valves, he explained, and is caused by one of the streptococcus germs commonly known as "green strep," which is always present in the mouth and air passages. When a tooth is extracted, the bacteria enters the blood stream and grows on one of the heart valves previously damaged by rheumatic fever.

Fashions

4660 SIZES 34-52

By ANNE ADAMS

Gown In Large Sizes

Here's the dream-gown you've been seeking! With slender lines, slim waist-tuck. Pattern 4660 is easy to make. Sleeveless, long sleeves, or cap-sleeves.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Some Short Names

Limit of Brevity Is Not Confined To Only Two Letters

Miss Lu, Chinese author and journalist, who measures only four feet, has been described as the smallest person with the shortest name, at the Paris conference. In the latter respect, however, she is not without rivals elsewhere. A few years before the war a little Miss Ma was christened in St. Paul's Cathedral, while the United States has a family of some distinction named Ma. Ma and Mc-Boone has a tradesman named Ny. Nor are such two-letter names the limit of brevity. First place in a recent New York telephone directory was held by Ma and there used to be a popular restaurant keeper in Paris whose name was O—Manchester Guardian.

HEALTH WEEK IN FEBRUARY

National observance of Health Week in 1947 has been set for the week beginning Sunday, February 2. It is announced by the Health League of Canada which annually sponsors the event in co-operation with departments of health and education throughout the Dominion.

National Social Hygiene Day, a feature of the week's observance will fall on the Wednesday, February 5. This is an annual international event observed in both Canada and the United States.

FARMER FINDS DEER BECAME TOO DEAR

STRAFFORDVILLE, Ont.—Deer! Deer! Deer!

On his way to form a hunting party in this Elgin County village things ran ahead of schedule for farmer Archie Dennis. While Dennis was driving to pick up his friends a deer raced across the road and collided with his car causing damage estimated at \$60.

As compensation Farmer Dennis banded the body of the animal into his auto and deposited it in a garage here while he went to notify police. The law investigated but found no deer. The interior of the garage was wrecked and damage estimated at \$200. A broken window showed how the deer, who played possum, escaped.

Mr. Dennis said he was glad it wasn't a moose.

Are Badly Needed

Many Canadians Have Discontinued Sending Food Parcels To Britain

The Montreal Star says many war-time enthusiasts are prone to fade away as soon as the fighting ceases. One of those enthusiasts is that which led thousands of Canadians to send food parcels to Britons throughout the war. Now fewer parcels are being sent. And the pity of it is that the people of the British Isles need those food parcels more than they ever did before, because the disappearance of reserves has forced a tightening of rationing.

All the theories in the world bring home no bacon unless they are put into practice—and nothing illustrates the power of continued effort so well as the fact that a dime doled 20 times is \$104,857.60.

PARENTS TAKE NOTICE

Marine Sgt. Clarence F. Henschel, 22, Seattle, asserting his Christian name was an impediment to his career, petitioned the Superior Court to change his name to "Richard." "Rightly or wrongly," his petition stated, "there is attached to the name of Clarence a connotation of ridicule, and the name is usually used in connection with, at least, giggling characters."

LITTLE DRAMAS OF HOME LIFE

All is quiet on the home front
... then Mom hits the roof!

MOM was the one who could ride out the storms. Little things didn't annoy Mom. She lived for the day, and if everyone else was happy, so was she. Nothing jerky about Mom's nerves. They had regular habits.

So when Mom started to blow up every now and then, everyone wanted to get at the reason. The doctor found it. He said Mom — of all people! — had one bad habit. She was drinking too much tea and coffee — and when the stimulus of those beverages left her, she was cranky.

Your nerves aren't expendable! Drink Postum — for its grand, rewarding flavor — and because it's the perfect way to avoid drinking tea and coffee. Postum contains no caffeine to upset the nerves, heart or stomach. Convenient — made right in the cup — economical — costs less than a cent a serving.

Chalmers' New Jewellery Store Opened To-Day

Mr. and Mrs. J. M. Chalmers took great pride this morning in opening their new and luxurious jewellery store to the Pass public.

A few months ago a contract was given Excel Builders Supply Co. to completely renovate the building and since that time a gang of workmen has been constantly engaged in making the store premises completely modern in every respect.

The entrance is designed in similar manner to many large city stores, the doorway being some five feet in from the main street and flanked on either side by display windows, which reach out to the street and parallel it. The stucco and vitrolite front will be completed in the spring.

Large fluorescent lights flood the store with illumination which is actuated by a gleaming white metal ceiling. The floor has Tarrazzo flooring.

Birch veneer, trimmed with cedar veneer, dominates the display windows, a large and modernistic island, pillars and also the bevelled walls at the rear of the main part of the store.

A large display island running the major length of the floor centres the store. It is four shelves deep and displays small wear. Inside the bottom of this island radiator pipes are located and help heat the store while remaining out of sight of the customers.

Along the left hand wall are large display cases housing many items of silverware. On the right hand side smaller display cases and shelves are placed and in due course will display many electrical appliances. At the present time they display miscellaneous goods.

The office is located at the south-east corner of the store and is quite spacious. At the rear of the office is a spacious workroom where repairs will be made to watches, jewellery and electrical appliances.

In addition to Mr. and Mrs. Chalmers, Miss Kathleen McLellan has been added to the staff.

An effort has been made to build up a good stock during the past month and the store is well filled with miscellaneous goods suitable for the Christmas trade. Unfortunately electrical appliances have been in short supply for some considerable time and Mr. Chalmers has not been able to acquire as many of these items as he had wished.

A most cordial invitation is extended to the buying public to inspect the store and its brand new stock.

Mr. and Mrs. Jack Moffitt and baby daughter arrived in Macleod on Tuesday from New Zealand and are the guests of Mrs. Moffitt's parents, Mr. and Mrs. H. T. Halliwell. They arrived in Canada on the liner Wangandila.

Mrs. John Jackson sr. and Miss Jean returned home at the week-end following a business trip to Calgary.

A large number of friends gathered at the IOOF hall on Tuesday evening in honor of Miss Eileen Hoyle, bride-elect. Hostesses were Helen Skura, Ida Castellano, Mary Duncan, fellow members of the bank staff, Mrs. G. Hoyle, Mary Unilowski and Mrs. S. Korcuka. Whist and bingo were played with prizes going to Mrs. K. Rhodes, first, Mrs. A. Vasek, second and Mrs. F. Lloyd, consolation. At bingo Ethel Kanik and Viola Johnson won the honors.

A very lovely lunch was served by the hostesses following which the guest of honor was presented with many beautiful gifts. She graciously thanked all for their gifts and thoughtfulness.

Among the out-of-town guests present were Mrs. L. Pozzi and Eride, of Hillcrest, mother and sister of the groom, and Mrs. R. Blenner-Hassett, of Calgary, Mrs. L. Barrows and Mrs. K. Rhodes, of Bellevue, sisters of the bride-to-be.

CARD OF THANKS

I wish to express my sincere thanks to those who attended the miscellaneous shower held in my honor and brought gifts. Also those who sent gifts and could not be present. I especially thank the hostesses Mary Duncan, Helen Skura, Ida Castellano, Mary Unilowski, Alma Hoyle and Mrs. S. Korcuka, for all their efforts and thoughtfulness.

Eileen Hoyle

Mrs. A. F. Gillis left at the week-end for her home at Merritt, B. C., after coming to Coleman to visit her sick mother, Mrs. C. F. Dunlop, who passed away on Monday, Nov. 18.

CHRISTMAS SEALS CAMPAIGN

This is the time of year when funds are raised to continue the fight against tuberculosis. From coast to coast the various provincial organizations start their annual campaigns for funds. Alberta Tuberculosis Association, with a very able executive has cut down the dreaded disease until Alberta ranks second as having the lowest death rate attributable to tuberculosis in Canada.

Coleman has experienced the Association's free X-ray clinic which visited here two years ago and had over 1700 local citizens attend. These X-ray clinics with their permanent staffs travel throughout the province giving Albertans free chest X-rays, revealing those who suffer from the disease and give them a chance to seek a cure before it is too late.

Coleman citizens can aid in the battle by buying and using Christmas Seals on their Christmas parcels. The TB campaign is worthy of everyone's support.

"You're starting just the way I did, Billy!"

Like Billy, Mr. Clark started in business delivering papers. He collected Fridays, settled with his publisher Saturdays and placed a portion of his profits in his savings account at the bank. That was 40 years ago. Mr. Clark has been using his bank regularly ever since.

Whether it was delivering papers, working week-ends at the corner store, or doing chores on the farm, you will always remember how proud you were of your first job, your first pay and your first bank book in your pocket. All were earned by your own initiative.

Today, as in the past, young people whose ambition is to get ahead, put their savings in the bank. It is the first step towards an association which can well be vital to business and personal life.

Confidence In The U.N.O.

THE UNITED NATIONS' ORGANIZATION, which was formed when the nations concerned were firmly united in the task of winning the war, has since that time faced many difficult situations and successfully averted any acute crisis in international affairs. Because of the unavailing assertion in the minds of the public between the United Nations' Organization and the League of Nations, there have been many people who have, from the beginning, had little confidence that the U.N.O. would fare any better than did the earlier attempt to unite the whole world in the interests of permanent peace and security. These people could be reminded, however, that nations, as well as individuals, may learn from experience and that the U.N.O., will undoubtedly be a more solid structure, because of the knowledge gained from the workings of the League of Nations.

The Need For More Patience

Mr. Sumner Welles, a former United States Under-Secretary of State, recently gave three lectures in Canada under the auspices of the J. W. Daffoe Foundation. The subject of these addresses, one of which was made in Winnipeg, was "The United Nations in the World of the Future", and in them Mr. Welles asked that people be patient in their attitude towards the U.N.O. He pointed out that although the organization is still in the early stages of its development, it has been able to avert international crisis during the extremely difficult period which followed directly after the war. If, he argued, it can accomplish this successfully, why should we not expect that it would preserve peace and restraint among nations even more successfully in the future?

An Effort To Prevent War

The opinion of Mr. Welles and of many other outstanding students of international relations today is that there is need for realism in facing the existing problems, and for confidence in the future. The United Nations' Organization is one concrete effort on the part of people from many lands to find a solution to their difficulties and to avert future wars. Those who will not face the fact that there are grave problems which must be worked out, and others, who look upon the United Nations' Organization as merely an idealistic attempt at co-operation, destined for failure, are both working against their own interests and against our greatest hope for security in the future. "Had it not been for the existence of the United Nations during the post-war period," Mr. Welles said, "I am persuaded that there would be little, if any, hope today of saving humanity from world anarchy." If a statesman of Mr. Welles' experience and ability believes this, surely the U.N.O. does merit at least the reconsideration of those who now place little faith in its effectiveness. Confidence, and a realistic attitude on the part of everyone toward the major problems of the times, might go far in improving conditions now and in the future.

Price Control And Rationing Information

Q.—How can I obtain the correct purchase price for fuelwood? I believe that our dealer is charging over the ceiling for fuelwood.

A.—All types of fuelwood are still under price regulations and all licensed fuelwood dealers are in possession of up-to-date schedules listing ceiling prices on all varieties of wood and must keep these schedules posted prominently in their places of business. If you wish, you can check fuelwood prices by contacting the nearest office of the Wartime Prices and Trade Board.

Q.—Are there still coupons in ration book 5 valid?

A.—Sugar-preserves coupons in ration book 5 81 to 825 are still valid. These coupons will be declared invalid on December 31st and coupon book five will then be of no further use.

Q.—What dates do we obtain butter in the month of December?

A.—Ration coupons for the purchase of butter in the month of December become valid on December 5, 12 and 26, the coupons being B34, B35 and B36 respectively. On December 31 butter ration coupons B29 to B34 will be declared invalid.

Q.—What are the numbers of the meat coupons in ration book six that will expire on December 31?

A.—Meat coupons M56 to M63 will expire on December 31.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

SMILE AWHILE

The colored preacher called all his flock together and before he started preaching he said:

"Brothers and sisters, you know Ah's been preaching to this congregation for about 15 years now, and every year at hog-killing time, all Ah gets is pigs feet and me' pigs feet. Now Ah'm goin' to tell you folks som'tin'; Ah preaches to this congregation any longer, Ah simply has got to eat higher up on dat hog!"

"Who's the swell man you was just talkin' to?" asked Tony, the bootblack.

"Aw, him and me's worked together for years," answered Mickey, the newsboy. "He's the editor of one of me papers."

Laboree—I dug this hole where I was told to, and began to put the dirt back like I was supposed to. But all the dirt won't go in. What'll I do?

The supervisor pondered, and then said: "I have it. There's only one thing to do. You'll have to dig the hole deeper."

Master of House: "Why did you tell your mistress what time I came home last night after I had told you to be quiet about it?"

Maid: "I didn't, sir. She asked me what time it was, and I told her I was too busy getting breakfast to notice."

"I want some arsenic for my mother-in-law."

"Have you a doctor's prescription?"

"No—but here's a photograph of her."

Catty Friend—Are you sure your husband really goes hunting in those hunting trips he's always taking?

Woman—Oh, yes, absolutely.

Catty Friend—But he so rarely brings any game home.

Woman—My dear, that's what makes me certain that he really goes.

His great love made the young man very eloquent.

"You are the most beautiful girl I have ever seen," he murmured. "I long to hold you in my arms, to kiss your lips, your eyes, to whisper in your ear 'I love you!'"

But the businesslike young lady cut him short.

"Well," she suggested, "I suppose it can be arranged."

Teacher—Do we eat the flesh of the whale?

Scholar—Yes, ma'am.

Teacher—And what do we do with the bones?

Scholar—We leave them on the side of our plate, miss.

TAKEN FROM NATURE

Supplies were dropped to fighters during World War II in containers copied from the design of maple seeds, and the containers spiraled to earth in the same manner that the maple seed wings its way to earth in spring.

INJURED IN PLANE CRASH

Seventeen passengers and Stewardess Betty Dobson, 25, of Chicago, shown here, were injured in the crash of a United Airlines plane which killed the pilot and co-pilot at Cleveland airport.

To Use Jet Planes

Royal Air Force To Equip Fighter Squadrons

LONDON.—The day of the fighter plane powered by the gasoline reciprocating engine is gone and the R.A.F. will equip all its line and reserve fighter squadrons with jet aircraft as soon as they can be manufactured, an official source told the British United Press.

No more models of the famed Spitfire will be designed, according to the manufacturers. Its place in the forefront of the world's fighting will be taken by De Havilland Vampire, Gloster Meteor, and their successors and competitors now being designed or built, air authorities said.

HOW TO RELIEVE PILE TORTURE QUICKLY AND EASILY

If you are troubled with itching piles or rectal soreness, do not delay treatment and run the risk of letting this condition become chronic. Any itching or soreness or painful passage of stool is nature's warning and proper treatment should be secured at once.

For this purpose get a package of Hem-Rol from your druggist and use as directed. The formula which is used internally is a small, easy to take tablet, will quickly relieve the itching and soreness and aid in healing the more tender spots. Hem-Rol is pleasant to use, is highly recommended and is the height of safety for anyone to risk a painful and chafing pile condition when such a fine remedy may be had at such a small cost.

If you try Hem-Rol and are not entirely pleased with the results, your druggist will gladly return your money.

WAR TERRORS MILD COMPARED TO DEER-HUNTING

BURLINGTON, Vt.—Armand Premo, 20-year-old war veteran, is convinced that the terrors of war are mild compared to deer-hunting. Premo brought home a 250-pound, eight-point deer from the woods in Huntington.

But only after: He knocked it down with shot from a .22 calibre rifle, threw away his gun and mounted the deer, rode it back for 65 feet as it bucked wildly, and slashed it 15 times with a hunting knife before the buck dropped in its tracks.

The bullet wound was superficial. Premo grinned and said:

"I guess I was a little excited."

If Your Nose Fills Up—

Spoils Sleep Tonight

Surprisingly fast, Va-tro-nol works right where trouble is to open up your clogged nose—relieve stuffy transient congestion. You'll like the way it brings relief. (NOTE: Va-tro-nol is also good for relieving sniffling, sneezing distress of head colds.) Follow directions in folder.

Farm Wife Worth More Than City Girl

Editor Of Farm Journal Gives Her Reasons

CHICAGO.—A farm wife is worth more to her husband than a glamorous city housewife, a woman editor said.

A farmer's wife is worth \$69,000 to her husband during her lifetime. A city wife is worth much, much less—how much less, the editor didn't say.

Gertrude Dieken, editor of the Farmer's Wife Section of Farm Journal, Philadelphia, made the estimate.

She said economists had arrived at \$69,000 after a 13-week study of farm wives and their work. Nobody has ever bothered to compute a city housewife's value to her spouse, in monetary terms.

"A city wife is worth a lot less," Miss Dieken said.

"A farmer and his wife are in partnership," she said. "They are together most of the time and they work together all day long."

"But in the cities, wives never see their husbands from breakfast to dinner. They don't know what's going on at the office and they don't share in the business." The study showed that a typical dairy farm housewife washed 1,569 pounds of clothes, carried four and three-quarters tons of water and spent 57 hours in her laundry during a 13-week period.

GEMS OF THOUGHT

HIGHER JOYS

Joy is an elation of spirit—of a spirit which trusts in the goodness and truth of its own possessions.—Seneca.

Who bathes in worldly joys, swims in a world of fears.—Phineas Fletcher.

Be faithful over home relations; they lead to higher joys: obey the Golden Rule for human life, and it will spare you much bitterness.—Mary Baker Eddy.

Tranquil pleasures last the longest; we are not fitted to bear long the burden of great joys.—Bovee.

Great joy, especially after a sudden change of circumstances, is apt to be silent, and dwells rather in the heart than on the tongue.—Fielding.

The most profound joy has its measure of gravity than of gaiety in it.—Montaigne.

The use of postal cards was first suggested in 1865 by the director of the Royal Prussian Post.

Veteran To Bicycle Family 4,000 Miles

To Use Novel Contraption Of Two Machines Welded Together

TAMPA, Fla.—A novel contraption, two bicycles welded together, was being made ready by a Canadian war veteran to transport his wife and three children on a 4,000-mile journey from Tampa to Seattle.

Robert K. Parker, 42, whose lungs were burned when his tank exploded while he was serving with the Canadian Army in France, hopes to make the trip in three months.

While he pedals one bicycle, his wife, Mrs. Emma Parker, 32, formerly a waitress at a Seattle hotel, will ride the other. Two children, Vornell, their 20-month-old daughter, and the baby boy, Dwight, eight months old, will be carried in a wooden box suspended between the two bicycles. The oldest boy, Dickie, 7, will ride a padded seat in back of the box.

Their suitcases and other belongings will be hung from various parts of the vehicle.

The family came from Seattle to Winter Haven by automobile last month to visit his father, Lawrence P. Parker. Unable to find a place for the five of them in Winter Haven, they tried unsuccessfully to find permanent lodgings in DuDe County, where Mr. Parker obtained work in a citrus plant, and in Tampa.

Temporary accommodation was provided at the servicemen's hotel here. Then they ran out of money and sold their car.

Finally Mrs. Parker got the idea of using two bicycles for conveyance back home to Seattle.

Mr. Parker said they planned to leave as soon as he receives his monthly disability pension from the Canadian government.

TASTING LIPTON'S TEA

ATOMIC BOMBS WILL BRING WHOLESALE DEATH TO CANADA IF WAR STRIKES AGAIN

OTTAWA—Canada's future in the world of the atom has begun to emerge, and the one firm prospect appeared to be wholesale death for Canadian civilians in any new war.

From the top research experts of the armed forces came the grim warning that atomic bombs will destroy Canadian cities and kill non-combatant Canadians by the thousands if war comes.

Simultaneously, officials disclosed some operations of Canada's atomic energy control board, which under Gen. A. G. L. McNaughton is working not only to control but to develop the mighty atom for purposes of both war and peace.

The prediction of the atom's destructive potential for the Dominion came from Dr. O. M. Solandt of Toronto, director-general of defence research for the armed forces. Before the defence medical association of Canada here, he said that the only defence against the atom is the outlawing of war.

If a bomb such as hit Hiroshima were dropped on a big Canadian city, said Dr. Solandt, 50,000 people would be killed in the attack. Another 50,000 would need prolonged treatment. Many more would require first aid.

This same city would lose 2,000 houses outright. Around 35,000 would need extensive repairs. Another 40,000 to 50,000 would be uninhabitable for a short time.

Against this backdrop of death and havoc, it was disclosed, the Dominion's atomic energy control board is working to correlate and advance all information on the atom for the benefit of Canada and the world in general.

WASHINGTON—Exposure to radioactivity may cause bodily damage affecting three generations, Vice Admiral W. H. P. Blundy, who directed the two atom bomb tests at Bikini this summer, said.

Reporting on the historic tests in a lecture sponsored by the National Geographic society, Admiral Blundy said: "Men, if entirely exposed within a mile of the bomb, might be killed instantly, or they might suffer a lingering death from the poison of radioactivity."

"What is even worse, they might live, only to endure the mental torture of not knowing whether they could father normal children."

"Tests with animals indicate that damage to the body from radioactivity can be transmitted to the victim's future children and even to his children's children."

SHORTAGE OF FEED
VANCOUVER.—A serious egg shortage this winter, with possible curtailment of shipments to Britain, was forecast by a spokesman for the Western Canada produce association who said feed dealers now were using reserve holdings of chicken feed and no replacements were coming forward.

CANADIAN FOOD SUPPLIES BEING SHIPPED TO ALASKA TO MEET EMERGENCY APPEAL

OTTAWA.—Trade Minister MacKinnon announced that shipments of Canadian food supplies have started to move to Alaska, which appealed to Canada to help meet a shortage created by the United States marine strike.

He announced that Canadian eggs, poultry, fresh fruit and vegetables have been sent to Alaska and added that arrangements were completed for the immediate shipment from Edmonton of 17½ tons of beef.

Arrangements also were made with the Canadian Wheat board for the release of flour.

Mr. MacKinnon said negotiations were completed with the United States department of agriculture for the meat shipments and it was ascertained that 35 tons of beef would be required to satisfy the immediate demand.

"Of this amount," he added, "arrangement was made the same night for the shipment of 17½ tons from Edmonton, the remainder to go forward as soon as the importers have been designated by the Alaskan authorities."

The minister said the seriousness of Alaska's food situation was made known by telegraph to Canada by the delegate to congress from Alaska and the chambers of commerce in Fairbanks, Alaska, and Prince Rupert, B.C., early this month.

An immediate decision was reached to permit the export of eggs, poultry, fresh fruit and vegetables.

"Normally," said Mr. MacKinnon, "only small shipments of foodstuffs are made from western Canada to this area, but in this case of emergency Canada was glad to be able to assist."

BIRTH RATE DECLINE

Chief Justice McRuer States Thirty-One Per Cent. of Homes Childless

TORONTO.—Decrease in the Canadian birthrate in the past 25 years was "an alarming truth," Chief Justice J. C. McRuer of Ontario said to a meeting of the Toronto Centre Presbytery of the United Church. Thirty-one per cent. of all homes were childless and there was a tendency to ridicule large families.

President of the royal commission on Christianized marriage and the Christian home, the chief justice presented the report of that body. He said the Canadian family is fading away to tiny proportions with 4,318,586 persons 15 years old or under—an average of 1.7 children to each family.

Twenty-three per cent. of families in the Dominion had only one child while only 17 per cent. had more than three. The province of Saskatchewan had the greatest family average—3.9 children for each family. Quebec was next with 3.0 children, Ontario third with 2.5 and British Columbia fourth with 2.3.

PROSPECTS GOOD

Trappers Expect Big Crop Of Muskrat Pelts In Spring

THE PASS, Man.—A bumper crop of muskrat pelts, an all-time record number of pelts, is expected to be harvested next spring by trappers in northern Manitoba and Saskatchewan.

Estimates from the north country are that the trappers will exceed their 1946 income by more than \$2,500,000 as long as the market holds up at the present price of \$3 for prime pelts.

Trappers at scattered points throughout the north report that next spring will represent the top curve in the muskrat cycle, and that indications for an exceptionally heavy crop have never been so good.

Increases in the beaver population have also been reported.

BOOKS FOR LIBRARY

MONTREAL.—Canadian Legion educational services announced it has handed over a first instalment of 700 volumes in good condition to the restored library of the University of Canada. The Legion hopes eventually to collect 100,000 volumes and \$100,000 cash for the university which was destroyed in the Canadian advance through Normandy.

CLEARING NORTH LANDS

EDMONTON.—Clearing and breaking of 100,000 acres of virgin soil in the Peace River district is expected to start shortly, it was disclosed here. The project, under direction of the Alberta department of lands and mines, will be used for a veterans' agricultural settlement scheme.

CANADIAN INDUSTRY Has Become Third Among Industrial Nations

GRANBY, Que.—Transport Minister Chevrier said that reversion of Canadian industry from war to peace now is three-quarters completed and more than 1,000,000 former members of the forces and war workers have been absorbed into peacetime positions.

In a speech prepared for delivery before the Granby chamber of commerce, Mr. Chevrier said Canada was third among the industrial nations of the world and had 1,000,000 more people gainfully employed than in 1939.

Last month there were 138,008 jobs available and 138,989 persons seeking employment. "This figure of misplaced persons is well below normal unemployment in times of relatively high levels of employment," said Mr. Chevrier. "Even during the peak period of the war there were at times as many as 50,000 or more people unemployed."

SEEKS STATEHOOD
WASHINGTON.—The latest unofficial tally of the vote by which Alaska approved a resolution seeking statehood is 9,565 to 6,820. It was the heaviest voting in the history of Alaska, which has less than 43,000 inhabitants of voting age.

MANY DESERTERS

LONDON.—Deserters from the British forces still at large total 15,068, War Secretary Bellenger disclosed in the house of commons. Some 13,176 are army men, 1,500 came from the navy, and 392 from the R.A.F.

U.S. SOUTH POLAR EXPEDITION PLANNED—Rear-Admiral Richard E. Byrd (left), seasoned Antarctic explorer, shown with Vice-Admiral Sherman, will shortly direct a U.S. navy south polar expedition to cold weather test aircraft, ships and other naval equipment. Isolated Antarctic region was chosen to allay Russian worries over operations near Soviet territory and assure secrecy.

LAW WAS EFFECTIVE

Manitoba Has Had No Claims Against Motorists Under Responsibility Measure

WINNIPEG.—Manitoba's safety responsibility law, now 10 months old, has operated so successfully that the past year saw no claims to build up an unsatisfied judgment fund will be reduced to 50 cents on Dec. 31, Attorney-General J. O. McLennan announced.

The fund, now approximately \$103,000, was started to cover any traffic claims in cases where the victim couldn't collect anything through suits. Claims are allowed only in cases of personal damage to the victim.

Mr. McLennan said no claims had been made against the fund to date. A major factor was said to be the rise in insured motorists during the past year from 27 per cent. to approximately 87 per cent.

The fact that a motorist against whom a claim is outstanding is off the road for life was said to be the second chief deterrent.

DISPUTE SETTLED

NEW YORK.—The Big Four foreign ministers broke their month-long deadlock on the future of Trieste and agreed on almost all the major issues which divided the western and eastern Allies on the problem.

CHRISTMAS SEALS
BY E. L. ROSS, M.D.
Medical Director, Sanatorium Board of Manitoba

Most people associate the colorful Christmas Seal with the campaign against tuberculosis but may not know, even though they buy them, the nature and extent of the remarkable work they make possible.

The money raised from the Christmas Seal sale last year paid for the x-raying of 100,000 people in Manitoba. Besides these x-ray surveys of whole communities and municipalities, Christmas Seals provide travelling clinics in thirty centres throughout the Province. They also provide rehabilitation service to patients in our sanatoria consisting of vocational guidance, training and assistance in finding employment.

Tuberculosis is an unnecessary disease for it is preventable and curable. The only means of irradiation is prevention which is based on the discovery of sources of infection at an early stage before germs can be spread to others. Treatment begins early results in almost 100 per cent. In spite of this knowledge tuberculosis still causes more deaths between the ages of fifteen and forty-five than any other disease.

Tuberculosis in its real early stages does not cause cough, tiredness, loss of weight nor make people feel sick so to find those with the disease before it has reached the symptom stage, before they become sick and before the germ has been passed on to someone else in the family or community, people who are apparently well have to be x-rayed. The "all-seeing eye" of the x-ray is the only means of discovering tuberculosis at this early stage.

Within the last few years new x-ray equipment that takes pictures on miniature films has made it possible financially to x-ray the whole population and it is the objective of the Sanatorium Board to complete the x-raying of everyone in the Province within the next two years. To

intensity this preventive service another complete mobile x-ray unit is needed and I therefore appeal to citizens to support generously the sale of Christmas Seals being conducted under the auspices of the Sanatorium Board of Manitoba for the support of travelling clinics, mass x-ray surveys and the rehabilitation of tuberculous patients. Every case of tuberculosis discovered early prevents the infecting of an untold number of others.

Your buying of Christmas Seals is a practical way to decorate your Christmas mail and parcels and at the same time they carry a message of health and are a worthwhile investment in protecting your home from tuberculosis.

MAGIC EYE SEES LUNG

(U.S. Public Health Service Photo)

With the new improved equipment, X-ray pictures of the lung require only a few seconds and can be taken with "clothes on." Group X-ray programs, and individual cases of tuberculosis while the disease is still in its early and most easily curable stage, are sponsored by tuberculosis associations from Christmas Seal funds.

POPULATION UP

Province of British Columbia Passed The 1,000,000 Mark

VICTORIA.—Population of British Columbia has passed the 1,000,000 mark according to figures released by the ration administration of the prices board, making an increase of 145,474 in the last two years.

Ration book No. 6, issued in September, went to 1,019,745 men, women and children. Book No. 5, issued in October, 1944, went to 874,271 people.

Half the increase was in Vancouver city, where a total of 376,839 books were issued, compared with 306,463 in October, 1944.

COUPONS EXPIRING

Prices Board Announces Those Becoming Invalid After December 31

OTTAWA.—The prices board announced that a group of sugar preserves, evaporated milk, butter and meat coupons will expire at Dec. 31 this year.

Invalid on that date will be all sugar-preserved "B" coupons Nos. 1 to 25 in ration book five, meat "M" coupons Nos. 56 to 63, and butter "B" coupons Nos. 29 to 34 in book six and all evaporated milk coupons bearing a beaver design.

RECONSTRUCTION MINISTER PREDICTS 1947 TO BE CANADA'S GREATEST BUILDING YEAR

OTTAWA.—Canada is likely to have the biggest building year in its history in 1947, Reconstruction Minister Howe said in a speech prepared for delivery.

Mr. Howe devoted a major part of his address, broadcast over the trans-Canada network of the CBC in the political free time series, to a discussion of housing problems.

He said that although there now were 30 per cent. more workers in the construction industry than a year ago the 1946 target of 60,000 houses would be short by 5,000 to 10,000. Responsibility was pinned by the minister on strikes which interrupted the flow of materials.

"A survey of unfinished dwellings in municipalities of 5,000 population and over shows, as at Sept. 7, 35,000 units incomplete," he reported. "Special efforts are being made by our priorities office to bring into occupancy those houses which are 50 per cent. or more complete."

He voiced optimism on next year's outlook.

"I have every reason to believe that 1947 will be by far the biggest building year that Canada has ever experienced. Since war ended the best effort of the government has been directed toward accelerating the production of houses, just as the year 1940 was directed toward accelerating the production of munitions of war."

"Then, as now, there was widespread criticism of the government's failure to produce. I would remind you that after 1940 there was little criticism about the volume of production of war munitions, and I predict that our efforts to accelerate the building of houses will meet with equal success. In saying this I am not minimizing the urgent need for emphasis that everything that I know of is being done to meet that need."

SETS NEW RECORD
British Jet Airliner Makes Fast Trip From London To Paris

PARIS.—The semi-jet-propelled British airliner Nene Lancaster, hopped from London to Paris in 43 minutes establishing a new commercial speed record.

Later, the plane sizzled down the Champs Elysees at rooftop height, with its two conventional gasoline engines shut off. The plane's two jet engines alone shot it through the air at a speed of 310 miles an hour.

The flight down the Champs Elysees was a demonstration arranged in connection with the Paris air show. The London-Paris hop was the first civil flight of a jet-propelled plane.

GROWN FOR EXPORT
B.C. Forestry Officials Say Christmas Trees Are Plentiful This Year

VICTORIA.—British Columbia's Christmas tree harvest, which last year produced nearly 2,000,000 trees worth more than \$250,000, is expected to reach a new record this year, forestry officials said.

Production is chiefly for export, going to all sections of the United States, and first passed the 1,000,000 mark in 1937.

Something on other post-war activities the minister reported that War Assets Ltd. is disposing of surplus war materials at the rate of \$20,000 a month with a total return to the Dominion so far of \$300,000.

Renegotiated war contracts had returned \$400,000.

Infantile paralysis first appeared in Norway and Sweden

HUGE ROCKET RANGE TO BE SET UP IN AUSTRALIA TO STRETCH ACROSS CONTINENT

RATION UNCHANGED

Butter Situation Will Be Reviewed Again Before End Of Year

OTTAWA.—The government has decided that the present individual butter ration of approximately six ounces a person weekly can be maintained until the end of the year, The Canadian Press learned authoritatively.

The supply position beyond that date, however, still is too obscure to determine whether or not a ration cut will be necessary and the butter stock and production picture will be reviewed again as the year-end approaches.

Authoritative sources reported that the supply position was running close to the margin where a reduction would be essential but it was expected the country could reach the new year without going to the extreme of rationing, when the ration probably was slashed to four ounces.

One reason for the improved situation this year is the fact the individual ration—at six ounces—is two ounces less than it was this time a year ago.

The only place where Canada could borrow enough butter to meet her needs would be New Zealand and it was brought out during the cabinet discussion that if Canada did take New Zealand butter she could do it only at the expense of Britain, which buys all that dominion's surplus.

CANADA'S SHARE

Liquidation Of German External Assets Will Give Dominion About \$15,750,000

OTTAWA.—Canada's share in the approximately \$450,000,000 worth of German external assets now being liquidated in neutral countries probably will total approximately \$15,750,000 government sources estimated.

This will be in addition to the Canadian share in Germany's internal assets. Of the internal assets, the Dominion expects to obtain 10,000 tons of German shipping and 1.5 per cent. of German's heavy industries.

Washington dispatch estimated the liquidation of German assets in neutral countries probably would yield approximately \$450,000,000 for 48 Allied countries.

NOT AFFECTED

OTTAWA.—A CBC spokesman said that the Canadian Broadcasting Corporation is not affected by the Soviet ban on direct broadcasts from Moscow to American radio networks. He says the CBC has never maintained a radio correspondent in the Russian capital.

RECONSTRUCTION MINISTER PREDICTS 1947 TO BE CANADA'S GREATEST BUILDING YEAR

PREDICTS TAX CUT

Best Way Is To Reduce Expenditures Says Defence Minister

LENNOXVILLE, Que.—Defence Minister Abbott, in a dinner speech predicted reductions in taxation and further relaxation of controls.

He said tax reductions on personal and business incomes would encourage private investment and enterprise and provide a greater incentive to work and produce. While sudden removal of all wartime controls would be unwise, more controls would be lifted in the near future.

Speaking in his home town at the joint fall assembly of the Eastern Townships Associated Boards of Trade and the Eastern Townships Settlement society, Mr. Abbott expressed the view that the best way to reduce taxes was through cuts in expenditure.
